

COVID-19

Strategic Preparedness and Response Plan

The COVID-19 pandemic was confirmed to have spread to Malaysia on 25 January 2020. Following the spike of cases in March, the government of Malaysia and the Ministry of Health (MOH) are focusing on mitigation measures to curb the further growth of positive cases in the country through social distancing and movement control order (MCO). Following the strained healthcare system due to the increasing number of infections by the virus, MERCY Malaysia launched its COVID-19 Pandemic Fund to supporting medical services and the essential needs of marginalised groups within the country. This dedicated fund is to implement the COVID-19 Strategic Preparedness and Response Plan - a plan for humanitarian assistance to be delivered within a continuous cycle of total disaster risk management that focuses on prevention; preparedness; response; and recovery. All aid assistance and deliverables are coordinated with MOH and the National Crisis Preparedness and Response Centre (CPRC), and the National Agency for Disaster Management (NADMA).

MARCH - DECEMBER 2020

COVID-19

Strategic Preparedness and Response Plan

On behalf of MERCY Malaysia, I would like to thank fellow Malaysians and citizens of the world for your contribution and partnership with MERCY Malaysia in this very important and critical humanitarian mission to fight COVID-19.

We are living in an age of the greatest pandemic the world has seen for the last 100 years, the COVID-19 pandemic. This is a pandemic which we need to fight together, and for all that to happen we need all sections and sectors involved.

MERCY Malaysia has launched the COVID-19 Pandemic Fund together with this Strategic Preparedness and Response Plan to support the severely strained healthcare system. The fund will also go towards supporting medical services and essential needs of marginalized and at-risks community groups.

We are very happy to be working with everyone, the public, private sector, other aid agencies, the government, partners and volunteers of MERCY Malaysia in reducing the humanitarian burden the country is facing now.

I also call on all donors and partners to maintain core support to activities and programs for the most vulnerable through this

Strategic Preparedness and Response Plan, which will be delivered within a continuous cycle of total disaster risk management that focuses on prevention; preparedness; response; and recovery.

Since the news of COVID-19 broke in January 2020, the organization has been communicating closely with the relevant authorities to offer assistance where required. We hope by doing so, we would have conducted a substantive as well as a qualitative and quantitative programs that will help not just the front line medical and non-medical workers, but also poor families especially those among the *asnaf* and B40 income group and those living in poor dwelling, the elderly, refugees, stateless children, person with disability, and others groups with low or no access to health information and services.

COVID-19 is the biggest pandemic we have seen for a century and it is one that we need to fight together. There is no better way in overcoming this pandemic than to fight it with experience and knowledge and to act upon it holistically. Which is why MERCY Malaysia is very happy to work with all of you in assisting those in need with our experience and knowledge, and also spreading these knowledge and awareness to make Malaysia and the world a healthier and safer place for all of us.

Dato' Dr. Ahmad Faizal Perdaus
President, MERCY Malaysia

COVID-19
Strategic Preparedness and Response Plan

8 **SUPPORT SERVICES/ COMPONENTS**

33 **PREPAREDNESS AND RESPONSE ACTIVITIES**

250,000 **AID RECIPIENTS IMPACTED DIRECTLY OR INDIRECTLY**

9 **MONTHS INTENSIVE OPERATIONS**

40.5million **FINANCIAL REQUIREMENTS***

COMPONENT 1

Critical preparedness, readiness and response support actions for MOH and CPRC

COMPONENT 2

Operational supplies support and logistics

COMPONENT 3

At-risk-community's livelihood support and logistics

COMPONENT 4

Infection prevention and control/ water, sanitation and hygiene (WASH)

COMPONENT 5

Mental health and psychosocial support (MHPSS)

COMPONENT 6

Information, education and communication (IEC) / awareness campaign

COMPONENT 7

Epidemics/ pandemics risk reduction

COMPONENT 8

Quarantine centers and field hospital auxiliary support

*This financial requirement represent a portion of the country's needs required to address immediate and urgent health and non-health response to the pandemic, estimated to be at RM 95 billion¹.
